---------	----------	----------

FUND OBJECTIVE

The fund aims to achieve long-term inflation-beating growth from a cost-efficient balanced portfolio with an equity exposure typically displayed by multi-asset high equity portfolios conforming to the regulations governing retirement fund investments.

WHO IS THIS FUND FOR?

This fund is suited to investors wanting high long-term growth in a cost-efficient multi-asset high equity fund with less volatility in the short term compared to a pure equity fund. The fund is suitable as a stand-alone retirement investment.

INVESTMENT MANDATE

The fund is exposed to all sectors of the market (shares, bonds, property and cash) with a maximum of 75% exposure to equities and may invest up to 25% of its portfolio offshore in line with Treasury guidelines. The fund will have a minimum of 50% exposure to passively managed underlying securities. Derivatives may be used for risk management purposes.

REGULATION 28 COMPLIANCE

The fund complies with retirement fund legislation. It is therefore suitable as a stand-alone fund in retirement products where Regulation 28 compliance is specifically required.

FUND COMMENTARY as at 30/06/2017

The broad market South African equity exposure in the fund is primarily through an allocation to the FTSE/JSE CAPPED SWIX All Share Index (CAPPED SWIX), which is intended to be a fairer reflection of the investment universe available to a South African investor. The CAPPED SWIX has a strategic weighting of 52.00% in the fund. The CAPPED SWIX returned -0.96% for the quarter ending June 2017. The strongest industry sector for the quarter was technology, which returned 6.11% for the quarter. Consumer services and healthcare were the worst performers for the quarter returning -5.36% and -5.26% respectively.

In addition to the broad local equity market exposure, the fund also has exposure to SA listed property, which has a strategic weight of 6.00%. The JSE SA Listed Property Index returned 0.91% for the quarter

ended June 2017. New Europe Property was the largest contributor returning 18.86% for the quarter. Growthpoint and Hyprop were the worst performers returning -5.48% and -4.85% respectively.

The international equity exposure is invested in the MSCI All Country World Index, which has a strategic weighting of 23.00%. The MSCI All Country World Index offers exposure to both developed and emerging markets globally. MSCI All Country World Index had a strong quarter and returned 4.45% in USD terms. The rand appreciated by 2.53% against the US dollar over the quarter, which would have detracted from the returns to South African investors.

To diversify the fund away from equity, the fund invests in nominal bonds through exposure to the JSE All

Bond Index (ALBI), which has a strategic weighting of 7.00%. The JSE ALBI returned 1.49% for the quarter. All durations bands had positive returns for the quarter with the shorter end of the curve outperforming the longer end, with returns of 2.03% and 0.96% for the 1 - 3 years maturity band and greater than 12 year maturity band respectively.

In addition to the nominal bond exposure, an allocation is also made to inflation-linked government bonds through exposure to the JSE IGOV Index, which has a strategic weight of 6.00%. The JSE IGOV Index returned 1.61% for the quarter.

*The JSE CLI duration buckets are used as a proxy.

OTHER INVESTMENT CONSIDERATIONS

MINIMUM INVESTMENTS:

- Monthly: R350
- Lump sum: R350
- Ad hoc: R350

INITIAL CHARGES (All fees are VAT inclusive):

There is no initial administration charge.

TAX REFERENCE NUMBER: 0556/838/25/8

ISIN CODES: Class A ZAE000201778

ONGOING

	Class A
Annual service fees (incl. VAT)	0.68%

This fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, include audit, custodian and trustee charges and service fees of collective investment schemes in which the fund holds interests. These are included in the TER.

The annual service fee includes a charge of 0.23% of your investment market value, per annum, in respect of Intermediary Services rendered to you by 22seven paid by the management company on a monthly basis.

Total Expenses	12 Months
	Class A
Total Expense Ratio (TER)	0.87%
Transaction Cost (TC)	0.09%
Total Investment Charge	0.96%

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The TER and TC cannot be determined accurately for the funds that are less than one year old. Calculations are based on actual data where possible and best estimates where actual data is not available.

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- You should ideally see unit trusts as a medium- to long-term investment. The fluctuations of particular investment strategies affect how a fund performs. Your fund value may go up or down. Therefore, we cannot guarantee the investment capital or return of your investment. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in the relevant fund's Minimum Disclosure Document (MDD) on www.22seven.com.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds. These are also the times we value our funds to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds at 17:00 close). Daily prices are available on the OMUT public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- This fund holds assets in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 30 June 2017.
